NAVI GAIT™

NaviGAIT™ is a new alternative for users with a mild foot drop. The amount of dorsiflexion is easily adjusted with an elastic coil to accommodate the user’s specific needs:

- Adjustable amount of dorsiflexion
- Low design
- Two sizes
- Removable interface

TOE OFF®

TOE OFF® is designed for moderate involved cases of footdrop. It gives a higher degree of ankle support and stability:

- Moderate to severe Footdrop
- Limb proprioception deficit
- Mild to moderate spasticity
- Stable Ankle
- Very Light-weight
- Our most popular product

KIDDE GAIT™

KiddieGAIT™ is a ground reaction AFO developed to support the child's foot from 9 month and up. KiddieGAIT should be regarded as a fram to create an individual solution for the child - combining the KiddieGAIT with an SMO, Surestep or other individually made foot orthotic.

BLUE ROCK™

BlueRocker™ is designed for the more severe cases of footdrop with more severe involvement and a need of increased stability and balance support:

- Footdrop with multiple involvement
- Severe Spasticity
- Reduced knee and hip control
- Very weak muscles structures
- Suitable for bilateral footdrop

COMBO™

COMBO™ is a unique combination of a ToeOFF together with a knee control upper section. This combination is designed to help individuals that suffers from Footdrop and also have Hyperextension problems in the knee.
